SYSTEMATIC EXPERIMENTAL RESEARCH ON THE
TENSILE STRENGTH OF CONCRETE. [1962] [21]p.
(4 figs. omitted).
Order from SLA \$2.60

63-10197

Trans. of Revue des Matériaux de Construction et de
Travaux Publics. [Edition C] (France) 1962, no. 561,
p. 168-180.

DESCRIPTORS: *Concrete, Tensile properties, Re-
inforced concrete, Tests, Reinforcing materials.

The aim of the study was to raise the tensile strength
of concrete. Computations take the potential tensile
strength as zero, thus leading to specifying a greater
sectional area, particularly for RC and prestressed
concrete, hence a higher cost. Moreover, the cracks
in concrete, due to inadequate tensile strength, lower
the overall strength of the work, for water gets in and
attacks the rodding.

63-10197
